FIREFLY

Ground Assault Tactical Intelligence

RAFAEL's Firefly presents a revolutionary concept in tactical intelligence for small units on the battlefield or in urban territory.

For the first time, infantry soldiers, Special Forces, and law enforcement units can obtain instantaneous live photos from areas without line of sight.

Firefly is fully independent and requires zero support from neighboring forces.

Key Features

- Terrain ortho-photo
- High resolution picture
- Data analysis
- 3D color video stream
- Quiet launch

Technical Data

- Range: 600 m
- Max altitude: 150 m (max range)
- Weight: 145 gr
- Length: 155 mm
- Caliber: 38 mm (sub-caliber)
- Launcher: M203 grenade launcher
- Camera: Two CCD color cameras
- Flight time: 8 sec (max range)
- Footprint: 1200 m²
- Resolution: 20 cm/pixel (max altitude)
